

OSHA Recordable Injury Rate

Public Works & Assets

5/14/2013

Measurement method		Why measure?		What is our goal?	
The number of injuries/illnesses per 100 full time employees (the number of injuries/illnesses multiplied by 200,000 and then divided by the total hours worked in a year)		To minimize the number and severity of workplace injuries, which will improve safety and reduce personnel costs		Reduce the OSHA rate by 5% each calendar year	
How are we doing?
